

TallySales E-Commerce

With an ever-increasing number of consumers browsing the internet for goods and services, growth in e-commerce continues to accelerate. If you're looking for ways to stay one-step ahead of the competition, and want a new avenue to market your products, TallySales offers the solutions you need to take your business online.

TallySales E-Commerce software enables you to easily manage an online store. The software was designed with the traditional retailer in mind, providing full integration into the TallySales Back Office Management Suite. This means that web-generated sales and customer information from your Web store are automatically included in the back office management tools and reports, like any other store in your operation.

Our E-Commerce software is fully integrated with shopping cart software from AbleCommerce, giving you the tools you need to create your online store, decide what products you want to carry online, set your web pricing and stock levels, add rich text and images, and finally process and ship the orders.

Highlights of TallySales E-Commerce/AbleCommerce Integration

- **Automatic Order Polling** – Online orders are automatically sent to the TallySales Back Office Management Suite for fulfillment.
- **Automatic Removal from Inventory** – Once an online order is fulfilled, your inventory count is automatically adjusted in the Back Office Management Suite.
- **Centralized Data Entry** – All data, whether it's E-Commerce product lists or inventory management information, is entered through the Back Office Management Suite.
- **Consolidated Customer History & Tracking** – Easily manage and maintain customers and membership groups.
- **E-mail Notification** – Automatically notify customers regarding order placement, stock availability, shipment, etc.
- **Multiple Shipping Options** – The system is integrated with UPS OnLine® Tools, USPS, Federal Express, DHL and Canada Post shipping services.
- **Content Management** – These tools help you create and administer product categories that enable the user to navigate through your store, as well as product details, product pictures, webpages and links.
- **Completing the Sale** – The software integrates with leading payment systems such as Authorize.NET, Verisign, LinkPoint, esalestax.com and CyberSource tax calculation services. It offers multi-currency display and multi-tier taxation to broaden international sales. It also provides for coupons, specials and discounting to enhance promotional opportunities.
